

### Child Assistants in Yemen

#### Autism children support project

#### 1. OUR TARGET:

33 Autism children who are unable to get the medicines in Abni Autism center .

#### 2. DONORS

- Various Local and international donors

#### 3. MISSION:

Our mission was focused to our Autism Center “Abni Autism center” the only relevant autism center in Yemen which is taking care of 70 Autism children and we provided the poor children with medicine and food supplies for their families reached to the following:

- 1- Medicines are not found in Yemen easily which cost USD2,200 to 33 child will cover their needs of medicine from one to two months.

- 2- Food supplies for 30 families which costs USD1,200 will cover the family's needs of foods for one months

#### 4. CURRENT AND FUTURE PLAN:

We are working nowadays to plan for two main projects that are very important for the coming period these project will help and enhance the children to enter and deal with community and have their own participation in the society.

The projects are:

- 1- Establish an awareness campaign to prevent violence against children with autism through a workshop involving a large number of people who have children with autism.
- 2- Establish a special basic education school in coordination with the our Autism Center and the Ministry of Education in Yemen for children who were graduated from our Autism center. We have about 33 children ready to enroll in basic education. They were rejected by private and government primary schools in Yemen
