Jharkhand a state of Eastern India region of URI is known for its waterfalls, hills, and holy places and is enriched with variety of minerals. It is also surrounded by forests and India’s largest tribal-dominated state. The only means of tribal livelihood is forest wealth. But, with the recent development and lack of policy use, there is a great loss in both environmental and economic forms. On one hand deforestation, on the other hand, the land of the Tribal people is being snatched with the promise of development. The extreme level of environmental degradation by the extracting companies became a great threat to our Indigenous (Tribal) community. There are 32 tribes inhabiting the Jharkhand state in India. To prevail in peace and justice, the indigenous community and our CCs launched movements like “save the river”, and “Jal Jamin Jangal Movement” (Water, Land, Forest) which also became the core issues of our 9 cooperation circles of the region and 6 more groups yet to join our network as of August 2023
